Prerequisite
None.

Execution procedure of the final exam
The exam consists of a written test. It will be in English; yet, the student who prefers to answer in Italian or Spanish the English questions of the written test can do so.

Written test (you need to have a picture ID document with you to be able to take the written test)
The written test will be composed of 4 to 6 questions, each usually including some sub-questions, about any of the course subjects illustrated either during lectures or practices, to be answered in free text which must be written clearly readable, big enough and fully comprehensible. On average, 20 minutes will be available to answer each single question. All material required to execute the test will be provided by the lecturer; the student only needs to have a pen.

In case a student decides to withdraw during the written test, he/she can do it by explicitly saying it to the lecturer and handing in all what he/she wrote during the test to the lecturer. Withdrawing has no consequence at all on any future possibility to take again the exam in any of the following exam calls of the course.

Written test evaluation: each question of the written test has associated a maximum score; the score given to each answer will be graded, according to the quality of the answer, within the maximum score limit associated with the related question. The written test evaluation score will be the sum of the scores obtained in each of the written answers.

The written test results will be published together with the date and place for the vision of written test corrections.
